

The background of the advertisement is a photograph of a modern, multi-story house at dusk. A large, light-colored sliding gate is partially open, revealing a dark car parked inside the garage. The house has large windows and balconies with plants. The overall scene is well-lit, with interior lights and outdoor lighting visible.

Nice

New Robus motors

Extended range of motors for sliding gates from 400, 600 and now also 800 kg, with leaves up to 8 m.

Nice

Robus

New generation of motors for sliding gates from 400 to 800 kg, also available in Hi-Speed version: high-performing, intelligent, connected.

Innovative design conceived for connectivity, to make these motors high-performing and always under control.

Robustness and efficiency thanks to selected materials, refined design, and high-performance lubrication.

Easy to install thanks to compatibility with previous Nice models and practical adjustment systems.

Always connected fast and intuitive programming via the MyNice Pro app.

Robus400

For sliding gates up to 400 kg.

New for 2025

Robus600

For sliding gates up to 600 kg.

Robus800

For sliding gates up to 800 kg.

Hi-Speed version

Robus600 HS

For sliding gates up to 600 kg.

Stand-by consumption 0.4W
(RBS400/RBS600/RBS800)

The release lever designed to be easy to use and to lock the cover to the base, ensuring the protection of the automation.

Always perfect installation: the new foundation plate allows you to quickly replace an existing Nice installation.

Minimal design characterized by extremely clean lines, shapes, and colors.

Adjustable photocell and passage light can be integrated directly into the motor, maximum safety in the gate movement area and the transit passage. (RBS600HS).

Eye Check system
An integrated LED light indicates the status of the automation and connected accessories.

NICE GREEN INNOVATION

Environmental savings

Environmental Product Declaration (EPD) available.
CO₂ emissions compared to the previous Nice model*:

-80%

* Verification of the declaration and data according to internal EPD management procedure; the process is verified by an accredited third party. The comparison refers to the RB600 model.

Robus 600 HS

For fast operation of sliding gates up to 600 kg.

Also available in KIT

New control units with integrated Wi-Fi, easy and fast programming via the MyNice Pro app

Housings for adjustable photocell and optional LED lights

Solemyo

Opera

Programmable via app

With Pro-View or BiDi-WiFi and the MyNice Pro app.

Irreversible, 24 VDC, magnetic limit switch, control unit with integrated radio receiver, compatible with optional backup battery (PSS124).

Ideal for intensive use: a 4 m gate opens in less than 10* seconds.

Efficient and safe: functional mechanical design and high-performance materials.

Release lever easy to operate and safe; magnetic limit switch, simple to install and allows reduction of the rack length.

Easy to program thanks to the MyNice Pro app, by connecting Pro-View or BiDi-WiFi to the control unit.

Easy to install:

- control unit with integrated receiver in raised position;
- greater freedom of horizontal and vertical adjustment of the base.
- The BlueBUS connector allows connections with only two wires between the control unit and up to 7 pairs of photocells and control, safety, and signaling devices;
- expandable control unit with accessory modules to increase the number of inputs or outputs;
- backward-compatible mounting with previous Nice models (Rox, Road, Robus series).

Smart:

- self-learning of working times;
- management of slowdowns, speed and force;
- self-diagnosis of the automation and accessories status, reported via the new **Eye Check System**.

Always connected even remotely, thanks to integrated Wi-Fi or the BIDI-ZWAVE plug-in module.

* In a standard installation, excluding acceleration and deceleration.

Nice

**A single ecosystem to connect,
simplify and control all home
automations.**

The new range of Robus HS and Robus sliding gate motors is designed to connect and integrate with the Yubii ecosystem®.

Thanks to plug-in communication interfaces, the new range of sliding gate motors integrates with your smart home system.

Nice connectivity tools

DESIGNED FOR
INSTALLERS

MyNice Pro App

Allows Nice installers to work on automations directly from their smartphone via the BiDi-WiFi multifunction interface.

BiDi-WiFi

MyNice App

You can use your smartphone and the MyNice app to manage your home's Nice automations wherever you are.

BiDi-WiFi

IBT4N & IT4WIFI

DESIGNED FOR
END USERS

Yubii Home App

You can use your smartphone and the Yubii Home app to manage all Smart Home automations and Z-Wave devices wherever you are.

YUBIIHOME

BiDi-WiFi

YUBIIHOME

BIDI-ZWAVE

BiDi-WiFi

Plug-in programming interface to configure automation via smartphone.

IBT4N

Interface to connect the Pro-View programming unit and the IT4WIFI smart interface.

IT4WIFI

Smart Wi-Fi interface to manage gates and garage doors remotely via smartphone.

BIDI-ZWAVE

Plug-in communication interface for communication between Z-Wave gateway™ and Nice motors.

YUBIIHOME

Gateway for remote control of Nice automations with radio receiver and all smart devices, Z-Wave™ and WiFi.

VOICE COMMANDS

Control your home automation in the simplest way possible, even from your smartwatch or smart car via Amazon Alexa, Google Assistant or Siri.

Transmitters

Bidirectional and unidirectional transmitters and receivers

MYGO BD

MyGO BD transmitters with 433.92 MHz radio frequency and bidirectional coding.

Also compatible with Nice O-Code coded receivers.

The new MYGO remote controls can be programmed via the MyNice Pro app.

Available in three versions: 2, 4 and 8 channels.

MYGO

MyGO transmitters with 433.92 MHz radio frequency and O-Code coding.

MyGO FM transmitters, ideal for use in cities or places where multiple devices are installed: the 868.46 MHz versions, Rolling Code with FM frequency modulation, ensure greater immunity to interference.

The new MYGO remote controls are programmable via the MyNice Pro app.

Available in three versions: 2, 4 and 8 channels according to customer needs.

Plug-in transmitters and receivers

ERA ONE LR AND OXI LR

Long-range, bidirectional, 4-button transmitter with LoRa®: 3 radio channels and 1 button to check the automation status. Integrated NFC technology. Bidirectional plug-in radio receiver with LoRa®.

Range up to 1 km and improved immunity to radio interference, also available in kit.

The **ONELRKIT** contains: 2 pcs. ON3ELR, 1 pc. OXILR, 1 pc. OX2UBP.

2-channel transmitters

ERA INTI

The colorful line of miniaturized 2-channel transmitters is available in six colors. Rolling code at 433.92 MHz, management of identification code and certificate, self-learning and integrated proximity receiver; with 72-bit O-Code coding, also compatible with receivers with Nice FloR coding.

Control and signaling devices

Digital switches and proximity readers

EDS / EDSI
EDSB / EDSIB

EDSWG

ETP

HSB1

MOCARD

ERA KEYPAD

Digital selectors in wall-mounted, flush-mounted or 100% wireless versions. Also available with Nice BlueBUS connection technology.

ERA TRANSPONDER READER

Proximity readers for transponder cards and badges, wall-mounted. Also available with Nice BlueBUS connection technology.

Control and signaling devices

ELAC
ELDC

ERA LIGHT

Flashing LED signal light, body particularly resistant to impacts, designed for mounting in various positions. Available in two versions: 90-240 Vac and 12-36 Vdc.

Control devices

EPSA
EPSAB

EPS
EPSB

ERA PHOTOCELLS SLIM

Fixed synchronized photocells, also with Nice BlueBUS connection technology. Available in anti-intrusion version with metal body. Ideal for tight spaces.

EPMA / EPMOA
EPMAB / EPMAOB

EPM / EPMO
EPMB / EPMOB

ERA PHOTOCELLS MEDIUM

Fixed or adjustable synchronized photocells, also with Nice BlueBUS connection technology. Available in anti-intrusion version with metal body. Ideal for the most common systems.

EPL / EPLB / EPL0 / EPL0B /
EPLI0 / EPLI0B

ERA PHOTOCELLS LARGE

Fixed or adjustable synchronized photocells, also with Nice BlueBUS technology. Available for wall or flush mounting.

PPK

PPH2

PPH4

PPH1

PPH3

EPMW

EPMOR

ERA PHOTOCELLS MEDIUM

In **wireless** and **reflection** versions.

ERA POST

Outdoor aluminum posts with protected housing for ERA photocells, selectors and proximity readers. Available in two heights: 500 mm and 1000 mm.

Simplified installation with

BiDi-WiFi

BiDi-WiFi is the pocket programming interface for controlling Nice automations via smartphone, compatible with all Nice automations for gates and garage doors with Bus-T4 connector.

Fast and intuitive app

Guided procedures via wizard with description of parameters displayed as in the instruction manual.

Remote management tool

Quick programming and multi-user dashboard with the possibility to create a database of your systems.

Management cloud for your business

Statistics and geolocation of installations to optimize the work of the whole team.

Facilitated manual viewing

Access the automation manual you are programming in real time.

Real-time firmware updates

Check available updates for the automation during intervention.

Easy
Installation
